

# NEW YORK METRO AREA RESOURCE LISTING

Individuals of Ashkenazi (Eastern European) Jewish heritage who are planning to start or add to a family should consider genetic screening before pregnancy.

Individuals with a regular doctor (especially women seeing an OB/GYN) may wish to discuss genetic screening with their doctor first. In many cases the doctor will be able to order the tests through the office. If the doctor does not regularly order or interpret genetic tests the patient may ask for a referral to a genetics program or genetic counselor.

The following is a list of genetics programs in the New York metropolitan area. Please contact them directly regarding the number of tests offered and insurance plans accepted.

*The JGDC does not endorse any of these programs and this list is offered for information purposes only.*

*For resources outside the New York Metro area, e-mail us at [info@JewishGeneticDiseases.org](mailto:info@JewishGeneticDiseases.org)*

## **Greenwich Hospital**

Genzyme Genetics  
5 Perryridge Road  
Greenwich, CT 06830  
203-863-3917 / [greenhosp.org](http://greenhosp.org)
